

Nose very black, extremely short, its tip being set back deeply between the eyes so as to form a lay-back. The nostrils large.

DISQUALIFICATIONS: Dudley or butterfly nose.

AMPLIFICATION:

The position of the nose is important and a guidepost to judging the entire head. Viewed from the front, the nose should be in line with the eyes. The face is flat, but flat on an angle. A vertical nose (i.e., the Peke or Pug flat-faced look) is one that lacks proper lay-back from chin to forehead. If the nose falls much below the eye it is generally a vertical nose accompanied by too much length of nose. The nose pad or leather should be large to accommodate the open nostrils.

UNDESIRABLE:

Pinched nostrils. Vertical nose pad. Nose pad set too low. Too much length of nose. Any variation from "very black" nose.

Correct lips, jaws and nose placement
extremely short nose with tip set back deeply between eyes
short plush lips, upward sweep of broad bottom jaw.

Incorrect lips, jaws and nose placement.
