

Eyes set well apart, very large, black, prominent, and well open. The eyelashes long and black. Eyelids edged with black.

AMPLIFICATION:

The eyes must be set well apart to allow room for the extremely short, well laid back nose to fit deep in line between them. The very large prominent eyes are a part of what gives the Griffon that "almost human" expression so important to breed type. The eyes are not really black but very dark brown, appearing almost black. Eye rims should be edged with black adding to the intensity of the dark eye. Well opened eyes are essential for correct expression.

UNDESIRABLE:

Light eyes. Small, squinted, or almond-shaped eyes. Eyes that bulge or with white showing around them. Close-set or high-set eyes. Lack of dark eye rims.

Correct Eyes
large, set well apart, set in line with nose, well open
almost human expression
